How To Add Up-Selling Suggestions

If you would like to recommend additional items for the guest to select from that would pair well with their food or services selection, it is possible to add up to 4 suggestions e.g. Offer juice, coffee, toast and extra bacon to and English Breakfast order. This can be achieved as follows:

1. Select Products - Menus then double click on the Menu that you wish to manipulate
2. Locate the required product from within the Menu Map by expanding the categories then select the edit pencil on the right-hand side of the screen

3. Select the Suggestions tab then select the required up-selling option from the Suggestion drop-down menu and repeat for all 4 options.
